

I am

Student

I'm trying to

make a website for  
students to find the  
companies  
requirements in prior

But

students are not getting any  
proper information regarding  
interview process and fake  
job postings

Because

contribute making publicly  
available a new dataset  
containing job seekers  
profiles and job vacancies

Which makes me feel

Frustrated

I am

Job seeker

I'm trying to

job postings  
according to  
their skill sets

But

filter fake job  
profiles and job  
recommendations

Because

Future directions of our work  
will focus on performing a  
more exhaustive evaluation  
considering a greater number  
of methods

Which makes me feel

Frustrated
