

SKILL / JOB RECOMMENDER

Project ID : IBM-Project-5064-1658747040

1. INTRODUCTION

1.1 Project Overview

Nowadays, job search is a task commonly done on the Internet using job search engine sites like LinkedIn1, Indeed2, and others. Commonly, a job seeker has two ways to search a job using these sites: 1) doing a query based on keywords related to the job vacancy that he/she is looking for, or 2) creating and/or updating a professional profile containing data related to his/her education, professional experience, professional skills and other, and receive personalized job recommendations based on this data. Sites providing support to the former case are more popular and have a simpler structure; however, their recommendations are less accurate than those of the sites using profile data.

Personalized job recommendation sites implemented a variety of types of recommender systems, such as content-based filtering, collaborative filtering, knowledge-based and hybrid approaches [AIO12]. Moreover, most of these job recommender systems perform their suggestions based on the full profile of job seekers as well as by considering other data sources such as social networking activities, web search history, etc. Despite the fact that many data sources can be useful to improve the job recommendation, previous studies showed that the best person-job fit is possible when the personal skills of a job seeker match with the requirements of a job offer.

1.2 Purpose

The main aim of the project is to building a model with a skill recommender solution through which the fresher or the skilled person can log in and find the jobs by using the search option or they can directly interact with the chatbot and get their dream job.

With the increasing popularity of online recruiting platforms in modern industry, most employers choose these platforms as a means of connecting with potential candidates for open positions. Developing job recommendation systems can significantly help both employers and job seekers in speeding up this process and finding the best matches. Using skill phrases extracted from unformatted and unstructured CVs and Job Descriptions, we implement two approaches with different similarity metrics, namely Word Mover's Distance[1] and Cosine Similarity.

2. LITERATURE SURVEY

2.1 Existing problem

Dealing with the enormous amount of recruiting information on the Internet, a job seeker always spends hours to find useful ones. Many times, people who lack industry knowledge are unclear about what exactly they need to learn in order to get a suitable job for them. We address the problem of recommending suitable jobs to people who are seeking a new job. We formulate this recommendation problem as a supervised machine learning problem.

2.3 Problem Statement Definition

I am Student,I'm try to make a website for students to find the company's requirement in prior.But,students aren't getting any proper information regarding interview process and fake job passing.Because,contribution making publicly available a new dataset containing job seekers profile and job vacancies,Which makes me feel frustrated.

I am job seeker, I am trying to job postings according to their skill sets.But,filter fake job profiles and job recommendations.Because future direction of our work will focus on performing a more exhausting evaluation considering a greater number of methods,Which makes me feel frustrated.

3.IDEATION & PROPOSED SOLUTION

3.1 Empathy Map Canvas

3.2 Ideation & Brainstorming

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Brainstorm & idea prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

1. Work on your own

2. Share & collaborate

3. Receive recommendations

Before you collaborate

A little bit of preparation goes along with unleashing ideas and it's what you need to make getting going.

[View example](#)

Define your problem statement

What problem are you trying to solve? Frame your problem as a how might we statement. This will provide focus to your brainstorm.

[View example](#)

Brainstorming

Brainstorming is the process of the creative mind and is best done when you're alone or with a small group.

Evaluate your ideas

Brainstorming is a process of generating ideas. It's not a process of evaluating ideas. It's a process of generating ideas.

[View example](#)

Share & collaborate

Share your ideas with your team and get feedback. This is a great time to refine your ideas and get input from others.

Receive recommendations

Receive feedback from your team and use it to improve your ideas. This is a great time to refine your ideas and get input from others.

Save & share your ideas

Save your ideas and share them with your team. This is a great time to refine your ideas and get input from others.

Review & reflect

Review your ideas and reflect on the process. This is a great time to refine your ideas and get input from others.

Iterate & improve

Iterate on your ideas and improve them. This is a great time to refine your ideas and get input from others.

Present & pitch

Present your ideas and pitch them to your team. This is a great time to refine your ideas and get input from others.

Implement & launch

Implement your ideas and launch them. This is a great time to refine your ideas and get input from others.

Measure & learn

Measure the success of your ideas and learn from the process. This is a great time to refine your ideas and get input from others.

Reflect & learn

Reflect on the process and learn from it. This is a great time to refine your ideas and get input from others.

Iterate & improve

Iterate on your ideas and improve them. This is a great time to refine your ideas and get input from others.

Review & reflect

Review your ideas and reflect on the process. This is a great time to refine your ideas and get input from others.

Iterate & improve

Iterate on your ideas and improve them. This is a great time to refine your ideas and get input from others.

Present & pitch

Present your ideas and pitch them to your team. This is a great time to refine your ideas and get input from others.

Implement & launch

Implement your ideas and launch them. This is a great time to refine your ideas and get input from others.

Measure & learn

Measure the success of your ideas and learn from the process. This is a great time to refine your ideas and get input from others.

Reflect & learn

Reflect on the process and learn from it. This is a great time to refine your ideas and get input from others.

Iterate & improve

Iterate on your ideas and improve them. This is a great time to refine your ideas and get input from others.

Review & reflect

Review your ideas and reflect on the process. This is a great time to refine your ideas and get input from others.

Present & pitch

Present your ideas and pitch them to your team. This is a great time to refine your ideas and get input from others.

Implement & launch

Implement your ideas and launch them. This is a great time to refine your ideas and get input from others.

Measure & learn

Measure the success of your ideas and learn from the process. This is a great time to refine your ideas and get input from others.

Reflect & learn

Reflect on the process and learn from it. This is a great time to refine your ideas and get input from others.

Iterate & improve

Iterate on your ideas and improve them. This is a great time to refine your ideas and get input from others.

Review & reflect

Review your ideas and reflect on the process. This is a great time to refine your ideas and get input from others.

Present & pitch

Present your ideas and pitch them to your team. This is a great time to refine your ideas and get input from others.

Implement & launch

Implement your ideas and launch them. This is a great time to refine your ideas and get input from others.

Measure & learn

Measure the success of your ideas and learn from the process. This is a great time to refine your ideas and get input from others.

Reflect & learn

Reflect on the process and learn from it. This is a great time to refine your ideas and get input from others.

Iterate & improve

Iterate on your ideas and improve them. This is a great time to refine your ideas and get input from others.

Review & reflect

Review your ideas and reflect on the process. This is a great time to refine your ideas and get input from others.

Present & pitch

Present your ideas and pitch them to your team. This is a great time to refine your ideas and get input from others.

Implement & launch

Implement your ideas and launch them. This is a great time to refine your ideas and get input from others.

Measure & learn

Measure the success of your ideas and learn from the process. This is a great time to refine your ideas and get input from others.

Reflect & learn

Reflect on the process and learn from it. This is a great time to refine your ideas and get input from others.

Iterate & improve

Iterate on your ideas and improve them. This is a great time to refine your ideas and get input from others.

Review & reflect

Review your ideas and reflect on the process. This is a great time to refine your ideas and get input from others.

Present & pitch

Present your ideas and pitch them to your team. This is a great time to refine your ideas and get input from others.

Implement & launch

Implement your ideas and launch them. This is a great time to refine your ideas and get input from others.

Measure & learn

Measure the success of your ideas and learn from the process. This is a great time to refine your ideas and get input from others.

Reflect & learn

Reflect on the process and learn from it. This is a great time to refine your ideas and get input from others.

Iterate & improve

Iterate on your ideas and improve them. This is a great time to refine your ideas and get input from others.

Review & reflect

Review your ideas and reflect on the process. This is a great time to refine your ideas and get input from others.

Step-2: Brainstorm, Idea Listing and Grouping

Step-3: Idea Prioritization

3.3 Proposed Solution

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	<p>Managing the huge measure of enrolling data on the Web, a task searcher generally goes through hours to see as helpful ones.</p> <p>Commonly, individuals who need industry information are hazy about what precisely they need to learn to get a appropriate occupation for them. We address the issue of prescribing reasonable responsibilities to individuals who are looking for a new work. We plan this suggestion issue as a administered AI issue.</p>
2.	Idea / Solution description	<p>Work proposal is a significant undertaking for the cutting-edge enrolment industry. A magnificent occupation recommender framework not just empowers to suggest a more lucrative work which is maximally lined up with the range of abilities of the present place of employment, yet in addition proposes to procure not many extra abilities which are expected to accept the new position. In this work, we made three sorts of data net-works from the authentic work information: (I) work change organization, (ii) work ability organization, and (iii) expertise co-event organization.</p>
3.	Novelty / Uniqueness	<p>From the most recent twenty years web based selecting stages have turned into an essential direct in many organizations for enlisting gifts. Such entries decline the ad cost, yet they experience the ill effects of data over-burden issue. Work entryways utilizing customary data recovery procedures, for example, Boolean hunt strategies are commonly utilizing basic word matching calculations. The main pressing concern of these entryways is their powerlessness to figure out the intricacy of matching between applicants' longings and associations' prerequisites.</p>

4.	Social Impact / Customer Satisfaction	<p>Social capability is especially striking for understudies who are arranged into one of the great frequency handicap gatherings like explicit learning inabilities, mental impediment, close to home unsettling influence, or consideration shortfall/hyperactivity jumble. Among the most famous of the educational methodologies for these understudies have been interactive abilities preparing (SST). Different metaexaminations of the writing recommend that SST has not delivered enormous, socially significant, long haul, or summed up changes in friendly capability of understudies with highrate handicaps. Likely clarifications for the powerless impacts in some meta-examinations are talked about and explicit proposals are presented for planning and creating more successful SST mediations.</p>
5.	Business Model (Revenue Model)	<p>Various postings for various work jobs and occupation positions are posted at various sources in the enrolment business. Thusly, this is a difficult and tedious errand to gather the data and figure out most important client work association planning as indicated by the abilities and inclinations of a client. This examination work has been finished to conceal this equivalent issue and endeavours have been made to give a doable and productive answer for something very similar. We propose a substance based suggestion motor, which consequently, gives best ideas to clients by coordinating their inclinations and abilities with the elements of a task posting. To create an expected suggestion, the proposed motor applies different text channels and element similitude estimations</p>

6.	Scalability of the Solution	<p>The present Recommender framework is a somewhat new area of examination in AI. The recommender framework's fundamental thought is to fabricate connection between the items, clients and go with the choice to choose the most proper item to a particular client.</p> <p>There are four principal ways that recommender frameworks produce a rundown of proposals for a client - content-based, Cooperative, Segment and half-breed sifting. In satisfied based sifting the model purposes details of a thing to suggest extra things with comparative properties.</p>
----	-----------------------------	--

3.4 Problem Solution fit

Problem-Solution fit canvas 2.0		Purpose / Vision	
Define CS, fit into CC	1. CUSTOMER SEGMENT(S) CS Who is your customer? The one who is interested in acquiring new skills and the one who is need of a job.	6. CUSTOMER CONSTRAINTS CC What constraints prevent your customers from taking action or limit their choices of solutions? Inadequate training, incorrect instruction, lack of necessary information about what to do or how to do it, poor equipment or supplies, lack of equipment or supplies.	5. AVAILABLE SOLUTIONS AS Which solutions are available to the customers when they face the problem or need to get the job done? What have they tried in the past? What pros & cons do these solutions have? Searching in online is better than noticing advertisement in newspapers.
	2. JOBS-TO-BE-DONE / PROBLEMS J&P Which jobs-to-be-done (or problems) do you address for your customers? There could be more than one opportunity; jobs in various domains.	9. PROBLEM ROOT CAUSE RC What is the real reason that this problem exists? What is the back story behind the need to do this job? Financial crises, an employment in the society.	7. BEHAVIOUR BE What does your customer do to address the problem and get the job done? i.e. directly related: search for jobs related to their skills; indirectly associated: learn new skills
Identify strong TR & EM	3. TRIGGERS TR What triggers customers to act? Facing jobless situation in society, trying to be self dependent.	10. YOUR SOLUTION SL Dealing with the tremendous proportion of selecting information Online, an errand searcher for the most part goes through hours to see as supportive ones. Regularly, people who need industry data are foggy about what unequivocally they need to figure out how to get a proper occupation for them. We address the issue of recommending sensible obligations to people who are searching for another work.	8. CHANNELS of BEHAVIOUR CH 8.1 ONLINE What kind of actions do customers take online? Searching for new skills to upgrade ourselves to get a new job.
	4. EMOTIONS: BEFORE / AFTER EM How do customers feel when they face a problem or a job and afterwards? i.e. lost, insecure > confident, in control - use it in your communication strategy & design.		8.2 OFFLINE What kind of actions do customers take offline? Refer books , journals, newspaper etc..

4.REQUIREMENTANALYSIS

4.1 Functional requirement

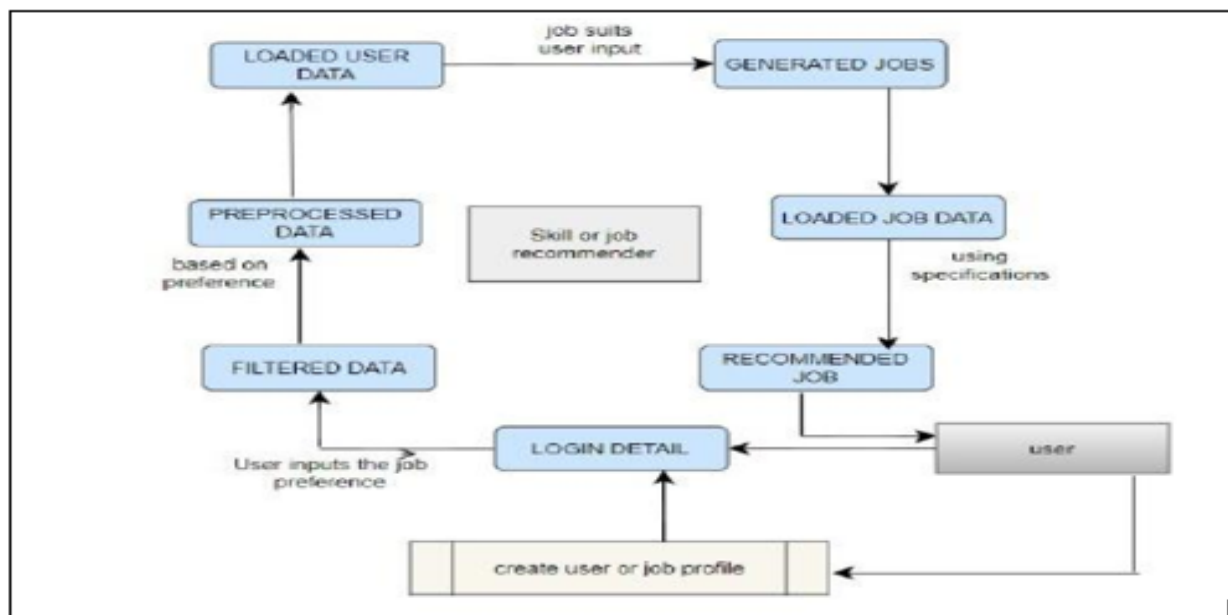

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	1. Registration through Form 2. Registration through Gmail 3. Registration through LinkedIn
FR-2	User Confirmation	1. Confirmation via Email 2. Confirmation via OTP
FR-3	User Login	1. Login through Form 2. Login through Gmail 3. Login through LinkedIn
FR-4	User Profile	Updation of the user profile through the Login credentials
FR-5	User Search	Exploration of Jobs that users search for using the filters
FR-6	User Acceptance	Confirmation of the job

4.2 Non-Functional requirements

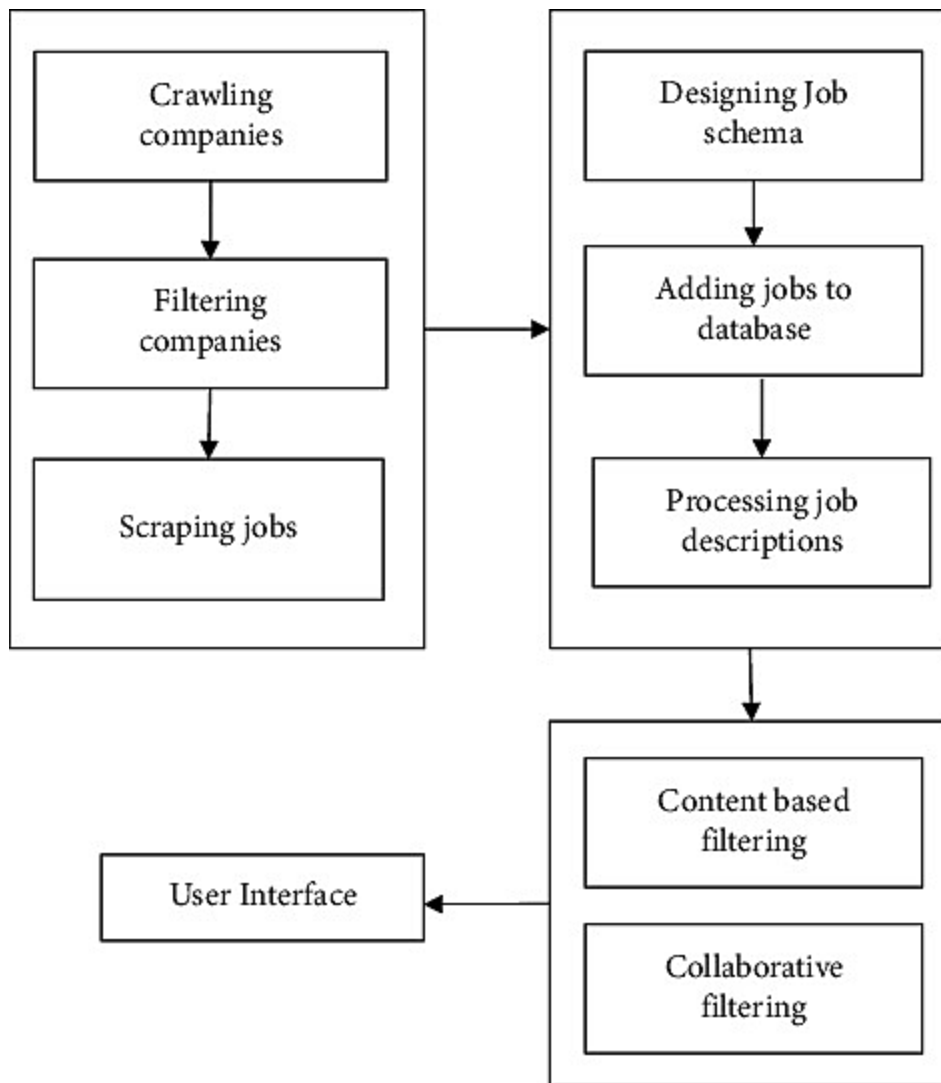

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	This application can be used by the job seekers to login and search for the jobs
NFR-2	Security	This application is secure with the personalised Login credentials
NFR-3	Reliability	This application is trustworthy which provides good job offers and suggestions of skill set with real time notifications
NFR-4	Performance	The performance of the application is quicker responses to search of job seeker
NFR-5	Availability	This application provides job offers and skillset with user's preference
NFR-6	Scalability	The response time of the application is quite faster with user choice

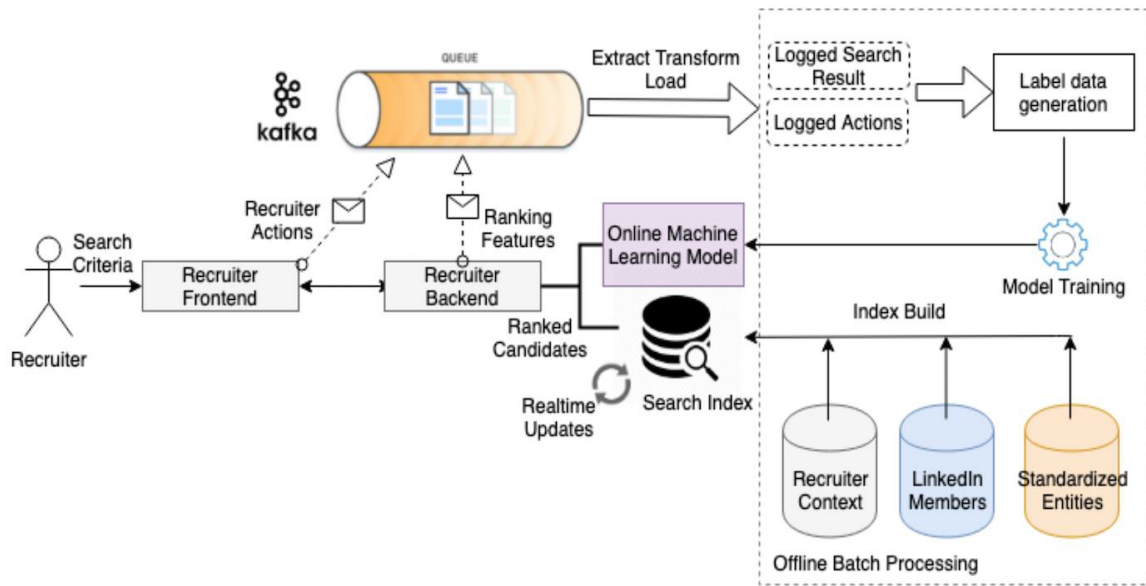

5.PROJECT DESIGN

5.1 Data Flow Diagrams

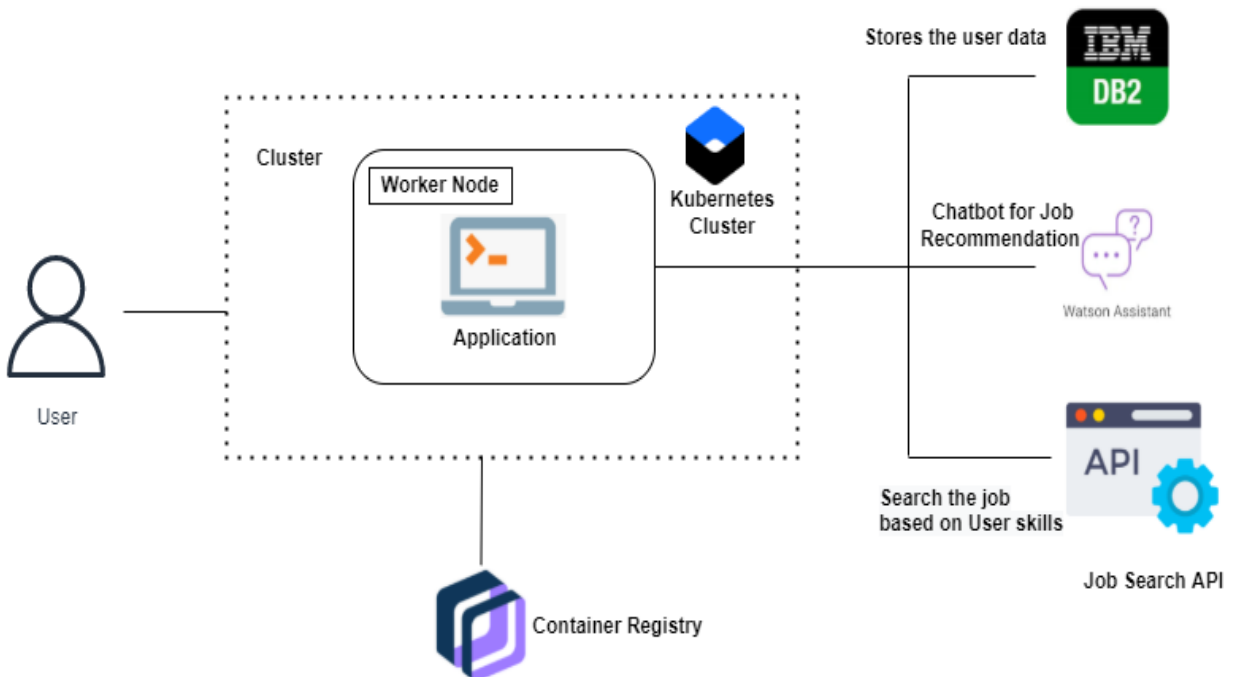

5.2 Solution & Technical Architecture

Technical Architecture:

5.3 User Stories

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Customer (Mobile user)	Registration	USN-1	As a user, I can register for the application by entering my email, password, and confirming my password.	I can access my account / dashboard	High	Sprint-1
		USN-2	As a user, I will receive confirmation email once I have registered for the application	I can receive confirmation email & click confirm	High	Sprint-1
		USN-3	As a user, I can register for the application through Facebook	I can register & access the dashboard with Facebook Login	Low	Sprint-2
		USN-4	As a user, I can register for the application through Gmail		Medium	Sprint-1
	Login	USN-5	As a user, I can log into the application by entering email & password		High	Sprint-1
	Dashboard	USN-6	As a user, I can access the dashboard for jobs to search	I can access the dashboard	High	Sprint-1
Job seeker (Web user)		USN-7	As a user, I can log into the application by entering email & password	I can log into the account I have created	High	Sprint-1
Administrator		USN-8	As a administrator, I can see the registration details	I can access the registration details	High	Sprint-1
		USN-9	As a administrator, I can see the login details	I can access the login details	High	Sprint-1
		USN-10	As a administrator, I can update the dashboard	I can update the dashboard	High	Sprint-1

6.PROJECT PLANNING & SCHEDULING

6.1 Sprint Planning & Estimation

Title	Description	Date
Literature Survey and Information Gathering	Gathering Information by referring the technical papers, research publications etc	2 SEPTEMBER 2022
Prepare Empathy Map	To capture user pain and gains Prepare List of Problem Statement	10 SEPTEMBER 2022
Ideation	Prioritise a top 3 ideas based on feasibility and Importance	17 SEPTEMBER 2022
Proposed Solution	Solution include novelty, feasibility, business model, social impact and scalability of solution	24 SEPTEMBER 2022
Problem Solution Fit	Solution fit document	29 SEPTEMBER 2022
Solution Architecture	Solution Architecture	1 October 2022
Customer Journey	To Understand User Interactions and experiences with application	8 October 2022
Functional Requirement	Prepare functional Requirement	14 October 2022
Data flow Diagrams	Data flow diagram	15 October 2022
Technology Architecture	Technology Architecture diagram	16 October 2022
Milestone & sprint delivery plan	Activity what we done	21 October 2022

	&further plans	
Project Development Delivery of sprint 1,2,3 & 4	Develop and submit the developed code by testing it	24 October 2022 – 19 November 2022

6.2 Sprint Delivery Schedule

Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed (as on Planned End Date)	Sprint Release Date (Actual)
20	6 Days	24 Oct 2022	29 Oct 2022	20	29 Oct 2022
20	6 Days	31 Oct 2022	05 Nov 2022	19	05 Nov 2022
20	6 Days	07 Nov 2022	12 Nov 2022	20	12 Nov 2022
20	6 Days	14 Nov 2022	19 Nov 2022	20	19 Nov 2022

6.3 Reports from JIRA

7. CODING & SOLUTIONING (Explain the features added in the project along with code)

7.1 Feature 1

Copyright © 2022. Idevmou & idesundar.

The Login Page UI mockup features a light blue background. At the top left is a home icon, and at the top right is a 'Sign Up' link. The main content is a white rounded rectangle with the title 'Login' in blue. Below the title are two input fields: 'Email' (with placeholder 'username') and 'Password' (with placeholder 'password'). Below the password field are two links: 'don't have account?' and 'forgot password?'. At the bottom is a blue 'Login' button.

FIG: Login Page

8. TESTING

8.1 Test Cases

Testcase #	Description	Test Steps	Test Data	Excepted Results	Actual Results	Pass/Fail
1	Check customer login with valid data [Login Page]	1. Go to site 2. Enter the valid User Id and Password 3. Click Login	User Id = demo1@sample.com Password = 123456	User able to Login into an application	As expected	Pass
2	Check customers login with invalid data [Signup Page]	1. Go to site 2. Enter the valid User Id and Password 3. Click Signup	User Id = demo2@sample.com Password = 126787	User able to Sign up into an application	As expected	Pass
LI-TC03	Check the recommendation system with skills	Entering skill of the user [demo skills]	Html, CSS, js and Vscode.	Web development	As expected	Pass
LI-TC04	Number of pings to the website	Engineer's Toolset (ETS)	30 pings in 10 minutes	Stability	As expected	Pass
LI-TC05	Checking the redirect ability	Redirecting of the pages	Clicking the hyperlinks	Correct Redirection	As expected	Pass

8.2 User Acceptance Testing

Testcase #	Description	Test Data	Excepted Results	Actual Results	Pass/Fail
1	Check response login with valid data [Login Page]	User Id = demo1@sample.com Password = 123456	Login should be successful	Login was successful	Pass
2	Check response login with invalid data [Signup Page]	User Id = demo2@sample.com Password = 126787	Sign up Should be successful	Signup Successful	Pass

9. RESULTS

9.1 Performance Metrics

Load Test

Scenario Name	Load Test – Skill/Job Recommender Application
Scenario Type	Load Test – Duration 1 hour
Scenario Objective	To Simulate the peak load and to monitor the performance of the Website
Steps	The online load will be maintained at steady state
Entry Criteria	All the monitors are in ready state
Exit Criteria	Response met the criteria and test completion report is agreed

Stress Test

Scenario Name	Stress Test – Skill/Job Recommender Application
Scenario Type	Stress Test
Scenario Objective	Objective is to verify that the application can handle the projected growth and to discover the breaking point
Steps	Ramp up to 150% of peak volume and continuously increase load until breaking point
Entry Criteria	All the monitors are in place Test Data is set up Peak load test completed successfully

Exit Criteria	Test completion report is agreed upon as per expectation
---------------	--

Endurance / Soak Test

Scenario Name	Soak Test – Skill/Job Recommender Application
Scenario Type	Endurance Test – Duration 8 hour
Scenario Objective	To discover memory issues and bottlenecks that might occur under daily usage of the application
Steps	Steady state is maintained for 8 hours with half of the peak load
Entry Criteria	All the monitors are in place Test Data is set up Peak load test completed successfully
Exit Criteria	Test completion report is agreed upon as per expectation

10. ADVANTAGES & DISADVANTAGES

10.1 Advantages

- The recommender system technology aims to help users in finding items that match their personnel interests; it has a successful usage in e-commerce applications to deal with problems related to information overload efficiently.
- Users will only get recommendations related to their preferences in their profile, and recommender engine may never recommend any item with other characteristics. As it is based on similarity among items and users, it is not easy to find the neighbour users.

10.2 Disadvantages

- Lot of data to effectively make recommendations.
- The model can only make recommendations based on existing interests of the user.

11. CONCLUSION

In this project, we used a literature analysis of many journals and proceedings related to the recruiting process and the job recommendation researches. We have seen from our literature review and from the challenges that faced the holistic e-recruiting platforms, an increased need for enhancing the quality of candidates/job matching. The recommender system technologies accomplished significant success in a broad range of applications and potentially a powerful searching and recommending techniques. Consequently, there is a great opportunity for applying these technologies in recruitment environment to improve the matching quality. This survey shows that several approaches for job recommendation have been proposed, and many techniques combined in order to produce the best fit between jobs and candidates. We presented state of the art of job recommendation as well as, a comparative study for its approaches that proposed by literatures. Additionally, we reviewed typical recommender system techniques and the recruiting process related issues. We conclude that the field of job recommendations is still unripe and require further improvements.

12. FUTURE SCOPE

- The objective of recommender systems is to provide recommendations based on recorded information on the users' preferences. These systems use information filtering techniques to process information and provide the user with potentially more relevant items.
- Personalized and actual recommendation based on skill sets.
